

## SPIRIT AERONAUTICAL SYSTEMS

### Visit of Accredited Defense Attachés to SAS Technology

On **July 1, 2024**, our company, SAS Technology, had the honor of hosting 19 accredited Defense Attachés to Greece, from a total of 14 countries, at our technical facilities.

The visit was requested and organized by the E4 Directorate of the Hellenic National Defense General Staff (HNDGS). The HNDGS/E4 Brigadier General Director and his staff accompanied the group. After a brief greeting from the president and CEO, Mr. Mike Spiridakos, the Attachés attended a presentation about the company and its systems.

A representative from Thales BE (that has ongoing partnership with SAS Technology), Mr. Giuseppe Picone, attended the event and spoke about the successful collaboration with SAS Technology and the significant operational value of the systems that result from combining SAS Technology's innovative UAVs with Thales' advanced weapon systems.

Following the presentation, the Attachés were given a tour of the company's exhibition where they had the opportunity to closely view our innovative systems. The visit concluded with a small reception.
